INTRODUCTION

Software Engineer with a Master's in Computer Science from University of Florida. Shipped production work across mobile, backend, and full-stack. Comfortable across Flutter, Kotlin, Python, and Golang. Looking for roles where engineering directly drives product outcomes.

EDUCATION

University of Florida, Gainesville **Aug 2023 - May 2025**
Master of Science, Computer Science *Gainesville*
• **GPA:** 3.83/4.00

MIT-WPU University, Maharashtra, India **Aug 2019 - May 2023**
Bachelor of Technology, Computer Science *Maharashtra, India*
• **GPA:** 9.58/10.00

PROFESSIONAL EXPERIENCE

Zenith Tech Solutions **Jul 2026 - Present**
Software Developer *Gainesville, FL (Remote)*
• Building reusable React component libraries with TypeScript and integrating Redux Toolkit, enabling consistent state management across frontend workflows and reducing duplicate code.
• Consuming and integrating RESTful APIs with async data handling using React Query, ensuring performant and reliable data fetching.
• Writing unit and integration tests with Jest and React Testing Library within CI/CD pipelines on GitHub Actions, improving code quality and reducing regression bugs.
• Translating Figma designs into pixel accurate, accessible, and responsive UI components, delivering consistent user experiences with minimal oversight.
• Leveraging Claude and Cursor for AI assisted development including code generation, debugging, refactoring, and test scaffolding to accelerate delivery.

Univirture Inc. **Jul 2025 - Jul 2026**
Software Engineer *Gainesville, FL*
• Architected and launched Skedaddle, a full carpooling mobile app for Android and iOS using Flutter/Dart, delivering 10+ screens end to end including onboarding, ride creation, booking, and route preview.
• Designed a real-time Supabase backend with relational schema, Row Level Security, and email-verified authentication, supporting full CRUD operations across the ride lifecycle.
• Integrated Google Maps SDK, Directions API, and Places Autocomplete to enable live route rendering and fuzzy geographic ride matching, reducing manual location input friction.

Tata Motors **Jul 2022 - Dec 2022**
Android Developer Intern *Pune, Maharashtra, India*
• Built a native Android app integrating live ECU telemetry and OpenStreetMap API to predict EV range in real time, improving estimation accuracy by 10-12% across varied terrains.
• Applied OpenStreetMap elevation data to model energy consumption across 20+ geographical test routes, enhancing predictive reliability for a team of 20+ engineers.
• Collaborated with a 10+ member cross-functional team across software, mechanical, and electrical disciplines to ship hardware-integrated software on schedule.

ACADEMIC PROJECTS

Research Collaboration Dashboard https://researchcolab.netlify.app/ **Jan 2025 - Apr 2025**
University of Florida
• Angular, Golang, JWT, RESTful APIs, HTML/CSS
• Architected a responsive Angular front-end for 100+ researchers enabling registration, profile management, and project collaboration features.
• Implemented JWT-based auth via Angular HTTP interceptors and session storage; designed a dynamic dashboard displaying 50+ concurrent project listings from a Go backend.

Comparative Law Analysis Using NLP **Aug 2024 - Dec 2024**
University of Florida
• Python, BERT, GPT-2, TensorFlow, Scikit-learn, Pandas, NumPy, BeautifulSoup, Scrapy
• Developed an NLP system (BERT, GPT-2) to compare legal frameworks by analyzing 1,000+ documents, achieving 85% accuracy in identifying similarities/differences.
• Scraped and processed 500+ web pages (Justia); identified 3 key areas of legal divergence, contributing to AI research in law.

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3
Web/Mobile: ReactJS, Angular, Flutter, Node.js, TailwindCSS, RESTful APIs
Databases: MySQL, MongoDB, Supabase, Firebase, SQLite
ML/DS: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, LangChain
Tools: Git/GitHub, Google Maps Platform, OpenStreetMap API, Gradle

RESEARCH PAPERS

• S. Kinger, B. V. Reddy, S. Jadhao, K. Hambarde, A. Hullur.Malware Analysis Using Machine Learning Techniques.*2022 2nd International Conference on Intelligent Technologies (CONIT), Hubli, India, 2022.*
